ROBERT

**BURCH**

REPUBLICAN STATE HOUSE

**NO LOBBYIST MONEY**

Uphold the **sanctity of life**, defend the **2nd Amendment**, **oppose Joe Biden's police state** and act under the recent Court decision allowing the state to **deport the illegal invaders of our nation**. This contrasts with six-year incumbent Ronny Johns who, on March 12<sup>th</sup>, joined with the Democrats and voted against the bill that would have cut off taxpayer funds to the illegal alien invaders of our nation.

**Oppose all that's woke:** Ensure our children's educational environments are free from inappropriate content and protect them from emerging, barbaric, dangerous woke ideologies.

**Reject all donations and gifts from lobbyists and their employers.** This money is the most likely reason for why our elected "*Republican*" representatives are frequently voting against our values. Robert Burch will abstain from the many thousands of dollars that are given to legislators and Ronny Johns.

**Strengthen Oklahoma's election laws:** Oklahoma's voting regulations, especially those permitting unrestricted mail-in voting, are susceptible to ballot harvesting and urgently need revision in order to realize President Trump's call for a focus on one day voting.

**Protect Parents' Rights.** Six-year incumbent Ronny Johns famously voted against HB 2339; it requires parental consent before the government can forcefully administer a vaccine on a child. This shocking attack on parents rights is inexcusable and, unlike Johns, Burch will always support parental rights.

**R**obert Burch, married to Nancy for 38 years, grew up working on farms and ranches. He earned his degree from Dallas Baptist University and recently retired from a career spanning 31 years in the transportation industry; where, starting as a driver, he progressed into sales and operations management. His blue collar background allows him to instinctively understand our values, (*there's a reason the trucking industry championed the rights of the individual during the COVID insanity*) and, now, just retired, he's free to work full time for us and a return to Christian, Constitutionalist, and conservative values. As the Chairman of the Pontotoc County GOP, Burch has seen firsthand how most "*Republican*" legislators are regularly betraying our values. A recent comprehensive audit of the Legislature's votes, conducted by the Vice-Chairman of the Oklahoma Republican Party, demonstrated just how bad this problem has become. It compared the votes to the principles in the Republican Party Platform and found that many, including our state representative Ronny Johns, are frequently voting against the principles that we hold most valued. **Johns received a score of just 29.57 percent.** In some cases, even Democrats are voting more in accordance with the Republican platform than Johns. Our nation is under attack from all sides, and we can't allow these politicians to keep playing their deceptive games of purporting to support our values when campaigning only to betray them after the election. **We have to step up and save the greatest republic in the history of the world, before it's too late.** Robert Burch is ready to do his part by stepping up and challenging Johns. Will you join him? He needs your vote on June 18th.

# Every Road a Toll Road

*How the tyranny of a single state representative prevented the entire Legislature from erasing a grave error, an error that might have drastic consequences for all of us.*

In 2021, Ronny Johns and the Legislature approved the first phase of the plan to make every Oklahoma road into a toll road.

The plan, funded with money from the Biden administration, created a pilot program known as the road user fee, or track and tax. It requires the government to monitor every mile driven by plan participants and to send them a bill for each mile driven.

This Orwellian plan has many possible abuses, most notably, allowing future governments to charge us according to a variable rate.

If you're driving a car that's "not good for the

environment," or if you drive too many miles per month, then your rate might just go way up.

This is the radical environmentalists' dream policy and it will punish rural Oklahomans who must drive to survive.

Or, perhaps the FBI or ATF wants to target you under Red Flag laws; the data generated by your toll tax will provide the perfect fishing opportunity for generating probable cause to take away your 2nd Amendment Rights.

Or, perhaps you make the mistake of attending church during the next national health emergency shutdown.

The government will know about that too. The potential abuses are endless.

There are two more phases before this plan can fully take hold. Phase 2, the "voluntary participation" phase, appears set for a vote in 2025, after this election when Johns can again vote for the program without fear of an impending election;

and Phase 3, mandatory participation, which we are already seeing being considered in Oregon, a state that, like Oklahoma, started with a pilot program like the one Ronny Johns supported.

In 2024, upon realizing that the proponents of the "every road a toll road plan" were waiting until after the election for their next move, a courageous legislator from another part of the state decided that we shouldn't just sit around

waiting for the next attack.

Instead, he sponsored a bill to go on the offense and to repeal the laws that authorized the plan in the first place.

He figured this would give the Legislature the ability to, before the election, send a message: "*The Biden Administration's Track and Tax Plan Won't Come to Oklahoma.*"

There was just one problem: His repealer bill was assigned to a committee chaired by our State Representative Ronny Johns, a known supporter of the track and tax pilot plan.

And, just as feared, Ronny Johns refused to let the committee vote on the bill.

What was Johns afraid of?

Why not allow a vote?

When Johns prevented a vote on the repealer, he showed where his

In 1932, Oklahoma Governor Alfalfa Bill Murray, also known as "*The Sage of Tishomingo*," declared martial law, deployed the National Guard, and defied a federal judge's order. Murray successfully fought to keep a toll-free bridge open between Oklahoma and Texas.

Murray, a constitutional scholar, referred to the Constitution in defending his actions.

Today, weak Oklahoma politicians, including Ronny Johns, have advanced legislation that uses Biden Administration money on implementing the plan that has one clear outcome: converting every Oklahoma road into a toll road.

Robert Burch wants to return to the era when strong Oklahoma leaders defended the common man against the elitist overreach of the federal government and its ever-encroaching surveillance state.

**Hard times create strong men,  
strong men create good times,  
good times create weak men, and  
weak men create hard times.**
